

Hi,

I am Ashwani Tandon, a final year student currently pursuing Bachelors of Technology in Information Technology. Currently I am working as an intern in Infosys Pvt. Ltd, Mysore, Karnataka.

As an Intern, I got generic training in python where I would get to know about the useful libraries of python that will reduce the code and help in various aspects in developing a project. In this way I am able to use that libraries very efficiently and in a proper way. I have done final year in python where I to generate the results of the social media people to find relations among them.

At Jaypee University of Information Technology, I served as senior member of Createch: Technical club of JUIT, where I managed various technical events in college for two years and contribute my efforts in organizing a successful events during the college fests. I am also part of Omega Leo Club, a student body of LIONS INTERNATIONAL, where I was teaching the students of the workers who are working in campus and are unable to go for coachings or tutitions due to the less exposure of study. We as a team are doing this for their better future. Recently in Infosys, I have managed a group of six members as we doing a group project under a mentor and I was the Scrum Leader of the group and able to manage these people properly.

I am really excited about this opportunity and would be grateful if I got this opportunity.
