Overview

I'm a **web** application developer who enjoys the challenges of working with cutting edge platforms. My expertise includes user interface design, web services, and SQL Server databases. I have good organizational skills and can easily "switch gears" between platforms, languages, and development environments. I'm a well-rounded generalist who can bring immediate value to an organization while quickly learning the particular technology and application domain at hand.

Keen to learn and share I am approachable and not hesitating to approach anyone and maintaining smooth communication among my team members. Support and contribute team work, ability to support and complete individual works with full responsibility.

Technical Skills

Working experience on **Asp.net**, MVC, **SQL Server 2012**, **JavaScript**, **Crystal Report**.

Learned and used different programming languages C, C++, Java, Android, Dot Net, HTML, during course work and project works and feeling confident in learning advanced programming skills.

Working knowledge on My Eclipse 6.0, Microsoft Visual Studio (2010), SQL Server on windows platform.

Experience in office tools like MS-Word, Power Point, MS-Excel.
